SUMMARY

Java Backend Developer with 2+ years of experience building scalable RESTful APIs and microservices using Spring Boot. Skilled in API integration, P0/P1 production issue resolution via Root Cause Analysis, and test automation (300+ Playwright cases, 90% coverage). Proficient in MongoDB, Elasticsearch, MySQL, and AI-assisted development, delivering reliable backend systems in Agile/Scrum environments.

TECHNICAL SKILLS

Languages: Java, SQL

Frameworks: Spring Boot, Spring Security

Architecture: Microservices, RESTful Services, API Integration

Databases: MongoDB, MySQL, Elasticsearch

Testing: Playwright, JUnit

Tools: Git, Bitbucket, Maven, IntelliJ IDEA, Jira, Postman

Practices: Agile/Scrum, Root Cause Analysis (RCA), Code Review, Exception Handling, AI-Assisted Development

EXPERIENCE

Software Engineer, TrusTrace, Coimbatore, India

Jun 2024 – Present

- Built and maintained 10+ RESTful APIs and backend services using Java and Spring Boot in a microservices architecture supporting distributed enterprise systems.
- Integrated 5+ internal and external APIs, enabling seamless communication and data exchange across distributed systems.
- Diagnosed and resolved recurring P0/P1 production issues in MongoDB and Elasticsearch through Root Cause Analysis (RCA), improving system reliability and uptime.
- Engineered 300+ automated test cases using Playwright, increasing QA automation coverage from 0% to 90% and reducing regression cycles.
- Delivered a complete backend feature in 1 week using AI-assisted development, reducing development time by 60% through optimized implementation.
- Contributed to Agile/Scrum workflows including sprint planning, code reviews, and cross-team collaboration with frontend and QA engineers.

Software Engineer Trainee, TrusTrace, Coimbatore, India

Sep 2023 – May 2024

- Resolved 10+ production bugs within the first month, contributing fixes to live Spring Boot services and improving application stability.
- Supported backend development across multiple microservices, including REST API integration, schema updates, and hands-on work with Spring Boot, MongoDB, and Elasticsearch.

PROJECTS

FoodieHub | Java, Spring Boot, MySQL, JWT

- Developed a secure backend for a food ordering platform with JWT-based authentication, role-based access control, and exception handling.
- Implemented RESTful APIs for menu management, cart functionality, and order processing using a layered architecture.

E-Learning Platform | Java, Spring Boot, MongoDB

- Designed RESTful APIs for course enrollment, content delivery, and learner progress tracking, using MongoDB for scalable document-based storage.

News Platform | Java, Spring Boot, Angular, MongoDB

- Built a full-stack news application with category-based content delivery and REST APIs to manage articles, categories, and user interactions, backed by MongoDB.

EDUCATION

Bachelor of Engineering (B.E.), Computer Science and Engineering

2020 – 2024

Karpagam College of Engineering, Coimbatore | CGPA: 9.18 / 10.0

CERTIFICATIONS & ADDITIONAL

Certifications: Google Prompting Essentials | **Languages:** English (Professional), Tamil (Native) | **LeetCode:** [grace58](#)
