LeetCode: grace58

SUMMARY

Java Backend Developer with 2+ years of experience in backend development, building scalable REST API solutions and microservices using Spring Boot. Strong foundation in object-oriented programming (OOP), distributed systems design, and database management. Skilled in API integration, P0/P1 production issue resolution via Root Cause Analysis, and test automation (300+ Playwright cases, 90% coverage). Proficient in MongoDB, Elasticsearch, MySQL, Docker, and AI-assisted development in Agile/Scrum environments. Open to global relocation.

TECHNICAL SKILLS

Languages: Java, SQL

Frameworks: Spring Boot, Spring Security

Testing: Playwright, JUnit

Databases: MongoDB, MySQL, Elasticsearch

Architecture: Microservices, REST API Development, API Integration, Distributed Systems, OOP

Tools: Git, Bitbucket, Maven, IntelliJ IDEA, Jira, Postman, Docker

Practices: Agile/Scrum, Root Cause Analysis (RCA), Code Review, Exception Handling, AI-Assisted Development, System Design

EXPERIENCE

Software Engineer TrusTrace, Coimbatore, India | Jun 2024 – Present

- Built and maintained 10+ REST APIs using Java and Spring Boot in a distributed microservices architecture, applying OOP principles for scalable enterprise systems.
- Integrated 5+ internal and external APIs, enabling seamless data exchange across distributed systems.
- Diagnosed and resolved P0/P1 production issues in MongoDB and Elasticsearch through Root Cause Analysis (RCA), improving system reliability and uptime.
- Engineered 300+ automated test cases using Playwright (TDD), growing QA automation coverage from 0% to 90% and reducing regression cycles significantly.
- Delivered a complete backend feature in 1 week using AI-assisted development, reducing development time by 60% through optimized implementation and system design.
- Mentored a junior engineer through onboarding and conducted code reviews across a team of 7 engineers.
- Contributed to Agile/Scrum workflows including sprint planning, code reviews, and cross-team collaboration with frontend and QA engineers.

Software Engineer Trainee TrusTrace, Coimbatore, India | Sep 2023 – May 2024

- Resolved 10+ production bugs within the first month on live Spring Boot services, improving application stability.
- Supported backend development across multiple microservices including REST API integration, schema updates, MongoDB, and Elasticsearch.

PROJECTS

FoodieHub | Java, Spring Boot, MySQL, JWT, Spring Security, Microservices, Swagger/OpenAPI

GitHub: github.com/SGraceGrace/foodieHub

- Designed and built 20+ REST APIs on a distributed microservices architecture with centralized API Gateway, JWT auth with Refresh Token flow, and RBAC for Admin, Restaurant, and Customer roles.
- Documented all APIs using Swagger/OpenAPI, enabling clear integration guides for frontend consumers.

E-Learning Platform | Java, Spring Boot, MongoDB

- Designed RESTful APIs for course enrollment, content delivery, and learner progress tracking using MongoDB for scalable document-based storage.

News Platform | Java, Spring Boot, Angular, MongoDB

- Built a full-stack news app with category-based content delivery and REST APIs managing articles, categories, and user interactions backed by MongoDB.

EDUCATION

B.E., Computer Science and Engineering | Karpagam College of Engineering, Coimbatore | 2020–2024 | CGPA: 9.18/10.0

CERTIFICATIONS & ADDITIONAL

Certifications: Google Prompting Essentials | **Languages:** English (Professional), Tamil (Native) | **LeetCode:** grace58
